

SIP – Systematic Investment Plan

Current Buy list December 2015

- Since our Current Equity Exposure is over 95%, we are not able to add stocks which are quoting at attractive valuations. But as Individual Investors, **if your Exposure is lower or your Total Capital size in Equities is increasing with regular monthly Income** – this Slide will help you to know stocks which are currently at good buying levels and you can Invest money in those.
- We believe this will help our clients to **take advantage of Market conditions** on a consistent basis with guidance from our Research team. Make sure, **if you are saving regularly – Invest in the stocks listed in this Slide constantly** and you can see the rewards going forward.
- Also make sure that your **Portfolio Allocation %'s are similar to our recommended allocation** and match our Portfolio over time. This will help you to maintain a Balanced Portfolio which performs under all Market conditions and **compounds your wealth** at a consistent rate. Also, **other than Our Portfolio stocks – the stocks where you can do SIP has been mentioned in the next Slide.**

The Millionaire Portfolio

Monthly Portfolio Update – December 8th 2015

★ Our key objective is to pick the right stocks at the right time by paying a fair price to build a balanced portfolio which will enable us to outperform the markets and achieve superior risk adjusted returns. We aspire to generate wealth by compounding money at a healthy rate by spotting profit making opportunities in solid companies with strong management which are available at a good discount to their intrinsic value.

Medium Term - Portfolio Guidance

- Accumulate more High Quality Stocks such as VA Tech Wabag & Mahindra Finance :

While most of our Portfolio clean up is over, we would like to accumulate more High Quality stocks in case of a rapid deterioration in prices. We would take advantage of the Market situation by rotating between the stocks where we find the highest value and good risk-reward metrics. Without any Emotional biases, we would like to sell stocks of companies where we don't feel there is adequate margin of safety and move on to stocks which great potential to profit.

We are highly optimistic on VA Tech Wabag and are convinced about the Multibagger return potential in the stock. We would certainly start buying the stock in our Portfolio soon. While the Cash position is not allowing us to buy now, we would sell some other stock in our portfolio to make way for VA Tech Wabag in the future.

- Average down on some beaten Stocks going forward :

Some of our High Conviction stocks including Bajaj Electricals, HSIL and Dewan Housing continue to be at very attractive levels. We believe that we should average down on these stocks during every dips. While we have very little cash left in the Portfolio, we believe there could be some Profit booking in some of our Stocks and deployment of those funds in these Stocks for Long Term returns.

- Close watch on the High Allocation Stocks :

Our Stocks including HSIL, Cera Sanitary ware and Indiabulls Housing Finance contribute almost 10% each to our Equity portfolio and hence there is very little room to make mistakes here. While this concentration increases the Volatility in the Portfolio, we believe that all these Stocks are good Businesses and hence would be good for Long Term wealth creation.

- Our Stock Exposure is currently above 95% of the overall Portfolio. Going forward, we would like to increase Cash levels by a few Percentage points.
- The total number of stocks is at 15. We intend to run a fairly tight and balanced portfolio. Hence, we would not like to add new stocks without proper replacement.
- During every significant fall, we shall be deploying cash pretty aggressively in fundamentally good companies . We would build some Cash position for this from some of our Existing stocks.
- Incase of opportunities where risk-reward is very attractive than any of our existing portfolio stock, we would take a rational decision to swap the current share with the new stock.

Add-On Portfolio for new Clients

Must Have stocks in your
Portfolio to be bought at the
current Prices. (post elections)

This is for new Clients who would like to have a little broader Portfolio with additional stocks and would like to avoid the strongly run-up names.

We still believe that the TMP Portfolio itself would do well. So, this Portfolio is only optional and useful for few clients alone.
